Monday, April 17
All-Network Teaching-as-Research Presentations

Every year, students from across the CIRTL Network conduct Teaching-as-Research (TAR) projects on specific teaching interventions in order to explore new evidence-based approaches in science, technology, engineering, and mathematics (STEM) classes. On Monday, April 17 at 4-5:30PM ET/3-4:30PM CT/2-3:30PM MT/1-2:30PM PT, 19 students will present their projects in an online event.

TAR - a core idea driving CIRTL’s work with grad students and postdocs - is the deliberate, systematic, and reflective use of research methods by STEM instructors to develop and implement teaching practices that advance the learning experiences and outcomes of students and teachers.
